

REMARKS

The Examiner has rejected claims 6, 15, 17 and 18 under 35 USC §112, second paragraph, on the grounds of indefiniteness.

The claims as rewritten clarify the description of the invention. Claims 17 and 18 now positively state that graphite is present, and define the upper end of the range.

Claims 7 and 8 have been incorporated into claim 1, which now requires either powdered graphite, powdered aluminum, or both, in the claimed compositions. Additionally, claim 1 now recites that the glassy material is present in either microsphere or microflake form, and is in agreement with the dependent claims.

Accordingly, it is respectfully submitted that the claims presented herein are in condition for allowance, and that action is requested.

Respectfully submitted,

Jean A. Buttmi
Reg. No. 24,236
